I am an Information Technology and Software Development professional with a solid background in systems analysis, networking, database management, and IT support, complemented by expertise in modern programming and frameworks. Skilled in Angular, JavaScript, Python, Flask, Django, PostgreSQL, and SQL, I build secure and scalable applications that address real-world needs. My experience also extends to project coordination, research support, and community engagement, allowing me to combine technical knowledge with organizational skills to deliver reliable and impactful solutions.

Technical Skills

- **Hardware & Systems:**
  System administration, network configuration, software installation/upgrading, technical support, cloud management.

- **Productivity & Office Tools:**
  MS Office Suite (Word, Excel, PowerPoint, Outlook, OneNote, Access).

- **Web & Content Management:**
  CMS platforms, responsive design, data security controls.

- **Database Management:**
  PostgreSQL, MySQL, SQL.

- **Programming & Development:**
  Python (Django, Flask), JavaScript, Angular, HTML, CSS, Git & GitHub.

- **Graphics & Design:**
  Photoshop, Illustrator, Figma, InDesign, Corel Draw, Acrobat, HTML/CSS

- **Communication Tools:**
  Email security, mail merge, filters

Professional Competencies

- Strong problem-solving and analytical skills
- Effective project coordination and research support
- Community engagement and teamwork
- Excellent written and verbal communication
- Adaptability and continuous learning
- Servant leadership and mentoring skills

Work Experience

ICT Support & Data Validator
Sub Sahara Research Services – 2024–2025

ICT Support

- Provide day-to-day technical support by diagnosing and resolving hardware, software, and network problems for staff and field teams.
- Set up, configure, and maintain laptops, mobile devices, servers, and other ICT systems used in research projects.
- Manage and support digital data collection platforms such as SurveyToGo to ensure smooth field operations.
- Implement data security measures, backup protocols, and access controls to safeguard sensitive project information.
- Train field teams and staff on proper use of ICT tools, ensuring efficiency and reduced technical downtime.
- Monitor internet connectivity and maintain ICT resources to guarantee uninterrupted project work during surveys.

Data Validation

- Validate and clean incoming data, ensuring accuracy, consistency, and alignment with project requirements.
- Support database management tasks such as updates, monitoring, troubleshooting, and performing quality control checks in SQL, MS Access, and PostgreSQL.
- Collaborate with project managers to prepare error-free datasets and generate reliable reports for analysis.
- Apply quality assurance measures to uphold data integrity and compliance with research standards.
- Detect, document, and resolve data discrepancies promptly, ensuring reliable and trustworthy results for decision making.

Field Supervisor (ICT Support & Research Operations)
Sub Sahara Research Services – 2024(Jan)–2024(Aug)

- Supervised field teams during data collection, ensuring proper use of ICT tools and adherence to project protocols.
- Monitored the quality of data gathered, verifying accuracy and completeness before submission.
- Provided on-site technical support by troubleshooting mobile devices, survey software, and connectivity issues.
- Coordinated field logistics, including equipment allocation, internet access, and smooth operation of data platforms.
- Addressed challenges and unexpected issues promptly to minimize delays and maintain workflow.
- Facilitated clear communication between field teams and project managers, ensuring instructions and feedback were well implemented.
- Guided and motivated field staff, promoting teamwork and efficiency to achieve project goals

ICT Support & Maintenance / Assistant Software Developer
Estwing Technologies – 2023–2025

- Troubleshot and resolved hardware, software, and network issues for staff and clients.
- Installed, configured, and maintained operating systems, applications, and security tools.
- Ensured system reliability through regular monitoring, updates, and preventive maintenance.
- Provided end-user support and training for smooth adoption of ICT resources.

- Assisted in developing and testing software solutions using Python, Django, Flask, and JavaScript.
- Supported web development tasks, including frontend updates with Angular and backend enhancements.
- Worked with databases (PostgreSQL, SQL) for queries, design, and performance optimization.
- Collaborated with senior developers on system improvements, documentation, and deployment.

Projects

Pharmacy Management System (PMS)
• Designed a system to streamline pharmacy operations including inventory, prescriptions, patient records, and sales.
• *Tech stack: Python, Django, SQLite*
• 🔗 GitHub Repository

Church Management System (ChMS)
• Built a web-based application to manage members, events, contributions, attendance, and communication for churches.
• *Tech stack: Python, Django, HTML/CSS, JavaScript*
• 🔗 GitHub Repository

AI Document Analyzer
• Developed a Django app integrated with OpenAI API to summarize, extract insights, and generate structured thesis reports.
• *Tech stack: Django, Python, OpenAI API*
• 🔗 GitHub Repository

Reusable Django Authentication System
• Athentication solution with login, registration, password reset, and profile management.
• *Tech stack: Django, TailwindCSS*
• 🔗 GitHub Repository

Mestowoot Media Services
• Developed a professional media production and digital services platform with Django.
• *Tech stack: Django, Bootstrap, HTML/CSS*
• 🔗 GitHub Repository

Regional Job Portal
• Built a Django-based platform for job seekers and employers to.

• *Tech stack: Django, Python, SQLite*
• 🔗 GitHub Repository

Education

KIPTOO KENNEDY

kiptoo097@gmail.com
P.O Box 122 Bomet, Kenya
https://github.com/kiptoo-097
+254799382984

- **Diploma in Information Technology.**
  -The Cooperative University of Kenya
- **Software Development.**
  -Moringa School
- **Kenya Certificate of Secondary Education (KCSE).**
  -Longisa Boys High School

Awards and Achievements

- **1st Runner-Up Team, Hult Prize Harvard (2020)** – Awarded a Certificate of Participation on June 15, 2020.
- Recognized for innovative problem-solving, teamwork, and contribution to impactful solutions addressing global challenges.

Languages

- English.
- Swahili.
- Kipsigis.
